

## Summary Prospectus

**October 4, 2016**

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's statutory Prospectus and Statement of Additional Information and other information about the Fund online at <http://oakridgeinvest.com/mutual-funds/fund-literature/>. You may also obtain this information at no cost by calling 855-551-5521 or by sending an e-mail request to [oakridgefunds@umb.com](mailto:oakridgefunds@umb.com). The Fund's Statutory Prospectus and Statement of Additional Information, both dated October 1, 2016, as each may be further amended or supplemented are incorporated by reference into this Summary Prospectus.

### **Investment Objective**

The investment objective of the Oak Ridge Global Equity Fund (the "Fund") is long-term capital appreciation.

### **Fees and Expenses of the Fund**

This table describes the fees and expenses that you may pay if you buy and hold shares of the Fund. You may qualify for sales charge discounts if you and your family invest, or agree to invest in the future, at least \$50,000 in Class A shares of the Fund. More information about these and other discounts is available from your financial professional and in the section titled "Class A Shares" on page 76 of the Statutory Prospectus.

	<b>Class A Shares</b>	<b>Class I Shares</b>
<b>Shareholder Fees</b> <i>(fees paid directly from your investment)</i>		
Maximum sales charge (load) imposed on purchases (as a percentage of offering price)		
Maximum deferred sales charge (load) (as a percentage of the lesser of the value redeemed or the amount invested)	5.75%	None
Redemption fee (as a percentage of amount redeemed)	1.00% <sup>1</sup>	None
Wire fee	\$20	\$20
Overnight check delivery fee	\$25	\$25
Retirement account fees (annual maintenance fee)	\$15	\$15
<b>Annual Fund Operating Expenses</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>		
Management fees	0.90%	0.90%
Distribution and service (Rule 12b-1) fees	0.25%	None
Other expenses <sup>2</sup>	1.31%	1.31%
Shareholder servicing fee	0.10%	0.10%
All other expenses	1.21%	1.21%
Total annual fund operating expenses	<hr/> 2.46%	<hr/> 2.21%
Fees waived and/or expenses reimbursed <sup>3</sup>	<hr/> (1.06)%	<hr/> (1.06)%
<b>Total annual fund operating expenses after waiving fees and/or reimbursing expenses</b>	<hr/> 1.40%	<hr/> 1.15%

<sup>1</sup> No sales charge applies on investments of \$500,000 or more, but a contingent deferred sales charge ("CDSC") of 1% will be imposed on certain redemptions of such shares within 12 months of the date of purchase.

<sup>2</sup> "Other expenses" have been estimated for the current fiscal year. Actual expenses may differ from estimates.

<sup>3</sup> The Fund's advisor has contractually agreed to waive its fees and/or pay for operating expenses of the Fund to ensure that total annual fund operating expenses (excluding any taxes, leverage interest, brokerage commissions, dividend and interest expenses on short sales, acquired fund fees and expenses (as determined in accordance with SEC Form N-1A), expenses incurred in connection with any merger or reorganization, and extraordinary expenses such as litigation expenses) do not exceed 1.40% and 1.15% of the average daily net assets of the Fund's Class A and Class I shares, respectively. This agreement is in effect until September 30, 2026, and it may be terminated before that date only by the Trust's Board of Trustees. The Fund's advisor is permitted to seek reimbursement from the Fund, subject to certain limitations, of fees waived or payments made to the Fund for a period ending three full fiscal years after the date of the waiver or payment.

### Example

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other mutual funds. The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The example also assumes that your investment has a 5% return each year and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

	<b>One Year</b>	<b>Three Years</b>
Class A shares	\$709	\$993
Class I shares	\$117	\$365

### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. The Fund is newly-created and, as a result, does not yet have a portfolio turnover rate.

### Principal Investment Strategies

Under normal circumstances, the Fund will invest at least 80% of its net assets (including amounts borrowed for investment purposes) in equity securities of companies located throughout the world, including the United States. Under normal market conditions, the Fund intends to invest at least 40% of its net assets in securities of non-U.S. companies (unless Algert Global, LLC, the Fund's sub-advisor (the "Sub-Advisor") deems market conditions less favorable to non-U.S. companies, in which case the Fund will invest at least 30% of net assets in securities of non-U.S. companies). The Sub-Advisor considers a company to be a non-U.S. company if (1) the company is organized under the laws of a country, or has its principal office in a country, other than the United States; or (2) at the time of investment, the company derived at least 50% of its total revenues during its most recent completed fiscal year from business activities outside of the United States. The Fund will allocate its assets among various regions and countries and will normally invest its assets in issues representing at least three different countries. The Fund will invest approximately the same extent as its benchmark index, the MSCI World Index (the "Index"), in companies organized, headquartered or doing a substantial amount of business outside of the United States. The Index is a broad global equity benchmark that represents large and mid cap performance across 23 developed market countries.

The Fund will invest primarily in equity securities including common stocks, preferred stocks, equity interests in real estate investment trusts ("REITs"), warrants and rights. The Fund may invest in exchange-traded funds ("ETFs") that invest substantially all of their assets in equity securities. The Fund may also invest in initial public offerings of companies ("IPOs"). The Fund may invest in American, European, and Global Depository Receipts ("ADRs," "EDRs," and "GDRs," respectively). ADRs are receipts that represent interests in foreign securities held on deposit by U.S. banks. EDRs and GDRs are similar to ADRs, except that they may be traded in international trading markets. The Fund may invest up to 15% of its net assets in companies organized in emerging market countries.

The Sub-Advisor will construct a diversified global equity portfolio of approximately 150 to 200 holdings. The Fund may invest in equity securities of issuers in all market capitalization ranges without limitation. From time to time, the Fund may have a significant portion of its assets in one or more market sectors, such as the industrials or consumer discretionary sectors.

When selecting securities for the Fund's portfolio, the Sub-Advisor uses proprietary systematic models to choose stocks which will comprise the Sub-Advisor's portfolio or "investment universe." The Sub-Advisor generates a composite score for each stock in its investment universe based on three internal models: Relative Value (to seek to detect mispriced stocks), Quality (to assess the sustainability of a company's operating performance), and Catalyst (to identify companies with changing financial expectations and changing levels of attention from investors). Each of these models is customized to the specifics of the underlying sector and region in which it is applied. The score is intended to represent the Sub-Advisor's view of the attractiveness of a company relative to its industry, country, and other risk factors. The Sub-Advisor uses an automated technological process that updates the ranking for each stock in its investment universe daily. A prospective trade list is generated from these rankings to construct the desired portfolio.

### Principal Risks of Investing

Risk is inherent in all investing. A summary description of certain principal risks of investing in the Fund is set forth below. Before you decide whether to invest in the Fund, carefully consider these risk factors associated with investing in the Fund, which may cause investors to lose money. There can be no assurance that the Fund will achieve its investment objective.

**Market Risk.** The market price of a security or instrument may decline, sometimes rapidly or unpredictably, due to general market conditions that are not specifically related to a particular company, such as real or perceived adverse economic or political conditions throughout the world, changes in the general outlook for corporate earnings, changes in interest or currency rates or adverse investor sentiment generally. The market value of a security or instrument also may decline because of factors that affect a particular industry or industries, such as labor shortages or increased production costs and competitive conditions within an industry.

**Equity Risk.** The value of the equity securities held by the Fund may fall due to general market and economic conditions, perceptions regarding the industries in which the issuers of securities held by the Fund participate, or factors relating to specific companies in which the Fund invests.

**Large Cap Company Risk.** Larger, more established companies may be unable to attain the high growth rates of successful, smaller companies during periods of economic expansion.

**Small Cap and Mid Cap Company Risk.** The securities of small capitalization and mid capitalization companies may be subject to more abrupt or erratic market movements and may have lower trading volumes or more erratic trading than securities of larger, more established companies or market averages in general. In addition, such companies typically are more likely to be adversely affected than large capitalization companies by changes in earning results, business prospects, investor expectations or poor economic or market conditions.

**Reliance on Technology.** The Fund's trading strategies are highly reliant on technology, including hardware, software and telecommunications systems. In addition, data gathering, research, forecasting, order execution, trade allocation, risk management, operational, back office and accounting systems are all highly automated and computerized.

**Preferred Stock Risk.** Preferred stock represents an equity interest in a company that generally entitles the holder to receive, in preference to the holders of other stocks such as common stock, dividends and a fixed share of the proceeds resulting from a liquidation of the company. The market value of preferred stock is subject to company-specific and market risks applicable generally to equity securities and is also sensitive to changes in the company's creditworthiness, the ability of the company to make payments on the preferred stock, and changes in interest rates, typically declining in value if interest rates rise.

**Foreign Investment Risk.** The prices of foreign securities may be more volatile than the prices of securities of U.S. issuers because of economic and social conditions abroad, political developments, and changes in the regulatory environments of foreign countries. In addition, changes in exchange rates and interest rates may adversely affect the values of the Fund's foreign investments. Foreign companies are generally subject to different legal and accounting standards than U.S. companies, and foreign financial intermediaries may be subject to less supervision and regulation than U.S. financial firms. Foreign securities include ADRs, EDRs and GDRs. Unsponsored ADRs, EDRs and GDRs are organized independently and without the cooperation of the foreign issuer of the underlying securities, and involve additional risks because U.S. reporting requirements do not apply and the issuing bank will recover shareholder distribution costs from changes in share prices and payment of dividends.

**Emerging Market Risk.** Many of the risks with respect to foreign investments are more pronounced for investments in issuers in developing or emerging market countries. Emerging market countries tend to have more government exchange controls, more volatile interest and currency exchange rates, less market regulation, and less developed economic, political and legal systems than those of more developed countries. In addition, emerging market countries may experience high levels of inflation and may have less liquid securities markets and less efficient trading and settlement systems.

**Currency Risk.** The values of investments in securities denominated in foreign currencies increase or decrease as the rates of exchange between those currencies and the U.S. Dollar change. Currency conversion costs and currency fluctuations could erase investment gains or add to investment losses. Currency exchange rates can be volatile and are affected by factors such as general economic conditions, the actions of the United States and foreign governments or central banks, the imposition of currency controls, and speculation.

**Warrants and Rights Risk.** Warrants and rights may lack a liquid secondary market for resale. The prices of warrants and rights may fluctuate as a result of speculation or other factors. Warrants and rights can provide a greater potential for profit or loss than an equivalent investment in the underlying security. Prices of warrants and rights do not necessarily move in tandem with the prices of their underlying securities and therefore are highly volatile and speculative investments. If a warrant or right expires without being exercised, the Fund will lose any amount paid for the warrant or right. If the Fund owns common stock of a company, failing to exercise rights to purchase common stock would dilute the Fund's interest in the issuing company. The market for rights is not well developed, and the Fund may not always realize full value on the sale of rights.

**ETF Risk.** Investing in an ETF will provide the Fund with exposure to the securities comprising the index on which the ETF is based and will expose the Fund to risks similar to those of investing directly in those securities. Shares of ETFs typically trade on securities exchanges and may at times trade at a premium or discount to their net asset values. In addition, an ETF may not replicate exactly the performance of the benchmark index it seeks to track for a number of reasons, including transaction costs incurred by the ETF, the temporary unavailability of certain index securities in the secondary market or discrepancies between the ETF and the index with respect to the weighting of securities or the number of securities held. Investing in ETFs, which are investment companies, involves duplication of advisory fees and certain other expenses. The Fund will pay brokerage commissions in connection with the purchase and sale of shares of ETFs.

**REIT Risk.** The Fund may invest in REITs. The Fund's investment in REITs will subject the Fund to risks similar to those associated with direct ownership of real estate, including losses from casualty or condemnation, and changes in local and general economic, supply and demand, interest rates, zoning laws, regulatory limitations on rents, property taxes and operating expenses.

**IPO Risk.** The Fund may invest in securities issued in initial public offerings. The market value of IPO shares will fluctuate considerably due to factors such as the absence of a prior public market, unseasoned trading, the small number of shares available for trading and limited information about the issuer. The purchase of IPO shares may involve high transaction costs. IPO shares are subject to market risk and liquidity risk.

**Liquidity Risk.** The Fund may not be able to sell some or all of the investments that it holds due to a lack of demand in the marketplace or other factors such as market turmoil, or if the Fund is forced to sell an illiquid asset to meet redemption requests or other cash needs it may only be able to sell those investments at a loss. Illiquid assets may also be difficult to value.

**Value-Oriented Investment Strategies Risk.** Value stocks are those that are believed to be undervalued in comparison to their peers due to adverse business developments or other factors. Value investing is subject to the risk that the market will not recognize a security's inherent value for a long time or at all, or that a stock judged to be undervalued may actually be appropriately priced or overvalued. In addition, during some periods (which may be extensive) value stocks generally may be out of favor in the markets. Therefore the Fund is most suitable for long-term investors who are willing to hold their shares for extended periods of time through market fluctuations and the accompanying changes in share prices.

**Management and Strategy Risk.** The value of your investment depends on the judgment of the Fund's Sub-Advisor about the quality, relative yield, value or market trends affecting a particular security, industry, sector or region, which may prove to be incorrect. Investment strategies employed by the Fund's Sub-Advisor in selecting investments for the Fund may not result in an increase in the value of your investment or in overall performance equal to other investments.

**Sector Focus Risk.** The Fund may invest a larger portion of its assets in one or more sectors than many other mutual funds, and thus will be more susceptible to negative events affecting those sectors. For example, the Fund may invest a significant amount of its total assets in the industrial and consumer discretionary sectors. Companies in the industrials sector can be significantly affected by general economic trends, changes in consumer sentiment and spending, commodity prices, legislation, government regulation and spending, import controls, and worldwide competition. Companies in the consumer discretionary sector may be adversely affected by fluctuations in supply and demand, changes in the global economy, consumer spending, competition, demographics and consumer preferences, and production spending. Companies in the consumer discretionary sector are also affected by changes in government regulation, global economic, environmental and political events, economic conditions and the depletion of resources.

**No Operating History.** The Fund is newly organized and has no operating history. As a result, prospective investors have no track record or history on which to base their investment decisions.

### **Performance**

The Fund is new and does not have a full calendar year performance record to compare against other mutual funds or broad measures of securities market performance such as indices. Performance information will be available after the Fund has been in operation for one calendar year.

### **Investment Advisor and Sub-Advisor**

Oak Ridge Investments, LLC is the Fund's investment advisor (the "Advisor"). Algert Global LLC is the Fund's sub-advisor (the "Sub-Advisor").

### **Portfolio Managers**

Peter Algert and Bram Zeigler have been jointly and primarily responsible for the day-to-day management of the Fund's portfolio since its inception on July 29, 2016.

### **Purchase and Sale of Fund Shares**

Currently, Class A Shares are not available for purchase. The Fund offers one class of shares: the Class I Shares. It is expected that the Class A Shares will be made available within 12 months of the Fund's inception. To purchase shares of the Fund, you must invest at least the minimum amount.

Minimum Investments	To Open Your Account	To Add to Your Account
<b>Class A Shares</b>		
All Accounts	\$1,000	\$100
<b>Class I Shares</b>		
All Accounts	\$1,000,000	None

Fund shares are redeemable on any business day the New York Stock Exchange (the "NYSE") is open for business, by written request or by telephone.

### **Tax Information**

The Fund's distributions are generally taxable, and will ordinarily be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-advantaged arrangement, such as a 401(k) plan or an individual retirement account. Shareholders investing through such tax-advantaged arrangements may be taxed later upon withdrawal of monies from those arrangements.

### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.
