Active Share	93.9%	--

The Portfolio is actively managed and current holdings and characteristics may be different. The holdings listed should not be considered recommendations to buy or sell any particular security listed. The Russell 2000 Growth Index measures the performance of small-cap U.S. growth stocks. An investor cannot directly invest in an index. Price-to-Earnings Ratio is the price of a stock divided by its earnings per share. Turnover is the number of shares traded for a period as a percentage of total shares in a portfolio.

## Portfolio Performance & Risk Measures

10 year as of 9/30/2018	Standard Deviation	Sharpe Ratio	Beta	Annual Alpha	R-squared	Upside Capture %	Downside Capture %
Oak Ridge Small Cap Growth Fund A	17.53	0.75	0.86	1.44	92.62	88.22	82.49
Russell 2000 Growth	19.60	0.69	1.00	0.00	100.00	100.00	100.00

**Call 855-551-5521 or visit oakridgefunds.com for the most recent month-end performance results. Current performance may be lower or higher than the performance data quoted. The performance data quoted represents past performance, which is no guarantee of future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost.** The Fund acquired the assets and liabilities of the Pioneer Oak Ridge Small Cap Growth Fund (the "predecessor fund") on October 17, 2014, at the same time as a change in control of the Advisor. As a result of the reorganization, the Fund is the accounting successor of the predecessor fund. Performance results shown in the bar chart and the performance table below for the period prior to October 17, 2014, reflect the performance of the predecessor fund. The predecessor fund acquired the assets and liabilities of another fund on February 13, 2004. Performance results shown for the period prior to February 13, 2004 reflect the performance of the prior fund. For Class A shares, a contingent deferred sales charge ("CDSC") of 1% will be imposed on certain redemptions of such shares within 12 months of the date of purchase. No sales charge applies on investment purchases of \$500,000 or more.

No sales charge applies on investment purchases of \$500,000 or more.

**Beta** is a measure of the volatility of a fund relative to the overall market. A beta less than one indicates lower risk than the market; a beta greater than one indicates higher risk than the market. **Alpha** is a measure of the portfolio's risk-adjusted performance. When compared to the portfolio's beta, a positive alpha indicates better-than-expected portfolio performance and a negative alpha worse-than-expected portfolio performance. **Information ratio** is a measure of portfolio management's performance against risk and return relative to a benchmark or alternative measure. The **Sharpe Ratio** is a risk-adjusted measure calculated to determine reward per unit of risk. It uses a standard deviation and excess return. The higher the Sharpe Ratio, the better the portfolio's historical risk-adjusted performance. **Standard deviation** is a statistical measure of the historic volatility of a portfolio. **Active Share** is a measure of percentage of stock holdings in a portfolio that differ from a benchmark index. **Upside/Downside capture** is a measure of relative performance versus an index during quarters when an index had positive returns or negative returns, respectively.

**Important Risks:** Equity securities, such as common stocks, are subject to market, economic and business risks that may cause their prices to fluctuate. Investments made in small capitalization companies may be more volatile and less liquid due to limited resources or product lines and more sensitive to economic factors. The Fund invests in foreign securities which involves certain risks such as currency volatility, political and social instability and reduced market liquidity. Emerging markets may be more volatile and less liquid than more developed markets and therefore may involve greater risks. The Fund invests in ETFs (Exchange-Traded Funds) and is therefore subject to the same risks as the underlying securities in which the ETF invests as well as entails higher expenses than if invested into the underlying ETF directly.

***Before investing you should carefully consider the Fund's investment objectives, risks, charges and expenses.
